

Ecotrack

Ecotrack
The International competition surface

Ecotrack, the International competition surface, is a combination of mixed fibres and a high-grade industrial washed silica sand which is carefully weighed and blended with a wax coating. Suitable for the demanding professional role in the equestrian world. Successfully installed for the racing fraternity, lunge pens, also in show jumping, polo and dressage establishments.

Ecotrack

The International
competition surface

Features and benefits

- Accurately manufactured by weight
- No irrigation system required
- Dust free
- Ready to use immediately following installation
- Cushioning effect thus sympathetic to the horse
- Provides secure footing for the horse – they perform to the best of their ability
- Droppings must be collected as these contaminate the surface
- Excellent climatic tolerance
- Suitable for indoor and outdoor use
- Adaptable – geared to fast or slow work

Martin Collins always recommends that you wear a properly secured hard hat, which meets the current regulations when riding
